### **PROJECT:**

**TITLE:** Increasing performance of ML Models using image processing techniques.

**DESCRIPTION:** In most of the ML algorithms the data-Pre processing layer precedes the actual ML logic. As part of this project, we would implement a series of image processing filters, which take care of data consistency and feature enrichment. As a result, we would notice the increased performance of the ML models. Furthermore, we would apply these filters to different ML models like Linear Regression, Decision tree, and Random forest and see the results inline with our claims.
